

JOB DESCRIPTION

POSITION: FIELD PRODUCTION ENGINEER

This is a full time, permanent position based out of Greenfire Resources Hangingstone SAGD Facilities south of Fort McMurray on a 7/7 rotation.

JOB DUTIES AND RESPONSIBILITIES:

Reporting to the **Director, Production & Completions**

Responsibilities of this role include, but are not limited to:

- Provide production engineering expertise within a multi-disciplinary team to monitor, analyze and optimize SAGD well production
- Collaborate and maintain a strong interface with Operations and Maintenance regarding the day-to-day well management to meet production targets, troubleshooting and scheduling of well-related field activities
- Support a multi-disciplinary engineering and operations team to identify areas for optimization, both subsurface and surface
- Identify and recommend new technologies to improve the SAGD recovery process
- Analyze and review steam injection and return rates, down hole, surface temperatures and pressures of all instrumentation during production
- Execute the well test program for gathering oil cuts, flow rates, and solids production and identify areas for optimization
- Participate in short and long-term planning, as well as assessing and making recommendations for capital projects
- Act as technical resource and provide support and direction, where required, to operations and other teams
- Ensure all corporate and regulatory standards are properly interpreted to minimizing risk of non-performance, incidents, damage to the environment or other loss of value, etc.
- Responsible for upkeep of daily and monthly production reporting
- Performs other duties and responsibilities as required

REQUIRED EXPERIENCE AND SKILL SET:

- Minimum of a Bachelor of Science in Engineering, APEGA registration required

- Progressive SAGD experience and/or field experience would be an asset, but not required
- Willingness to learn and adopt new production techniques, as well as tinkering with existing processes to optimize both production and costs
- An ability to marry operational decisions with resulting economic impact
- Excellent entrepreneurial work ethic
- Strong working knowledge of Microsoft Office including Excel, Word, and PowerPoint
- Excellent communication skills, both written, and oral
- Must hold a valid Class-5 driver's license
- Must be legally permitted to work in Canada

CORE COMPETENCIES:

- Builds Personal Leadership, continually builds self-awareness and leadership effectiveness
- Develops People & Greenfire Culture, demonstrates an unwavering commitment and investment in developing individuals, teams, our culture, and values
- Fosters Collaboration, builds strong and trusting internal relationships by modelling and supporting collaboration across the company
- Champions Business Excellence, leverages creative thinking, business insight and financial acumen to build operational efficiency and long-term business success
- Shapes Vision & Strategy, strategies that are aligned with Greenfire and will support the overall vision of the company. Executing on the short and long-term strategies to create a thriving and sustainable business

Why Greenfire?

GROC explores, acquires, develops, and produces oil and gas in the Canadian energy sector and internationally. In 2020, the Company's operations team was awarded the Energy Excellence Awards Champion for Project Excellence in Oilsands, voted by its peers to recognize energy excellence and focused advancement and collaboration with Canada's energy sector. GROC is well capitalized to seek additional oil and gas assets within Canada.

*** Compensation commensurate with experience ***
